Michael Grater : Papercraft Projects with One Piece of Paper (Other Paper Crafts) before purchasing it in order to gage whether or not it would be worth my time, and all praised Papercraft Projects with One Piece of Paper (Other Paper Crafts):

Witches on broomsticks, curly-tailed mice, wide-eyed owls, sharp-beaked woodpeckers, squiggly caterpillars! See these and dozens of other creatures come to life simply by folding, cutting, and curling a single sheet of paper. Even very young hands can fashion a variety of whimsical wonders with the help of this easy-to-read and amply illustrated

guidebook. No special artistic skills or materials are needed. Ideal for classroom or hobby room use, Michael Grater's entertaining book shows how to construct a myriad of shapes each one hidden in a piece of paper and just waiting to be lifted out. Clear step-by-step instructions and 92 vivid illustrations allow paper engineers of all ages to create such fanciful figures as a shark, frog, tortoise, seahorse, crocodile, lizard, rabbit, and horse, as well as a lavish fireworks display, and a portrait gallery of delightful faces. Here's an unusual and inexpensive learning tool that parents and teachers can use to develop a child's sense of color and pattern and to encourage creativity and imagination.
