This little tome has plate after plate of various decorations and embellishments, made to persons, architecture, glass, pottery. My only quibble is that they are immaculately sourced, but not described.The illos are all copyright free. Be prepared to enlarge as you copy, though; some of the details are way wee bitty.0 of 0 people found the following review helpful. Exactly what it says it isBy CustomerExactly what it says it is. It gives a great overview of the different historical styles of ornament. More a survey than anything in depth.0 of 0 people found the following review

helpful. Great!By Harley GrayVery nice.
